Q.E.D. [1]

Author Contributions

Bernhard Egger performed all experiments, analysis, made all graphs, and wrote the first draft of the paper. Kevin Smith discussed the initial idea with BE in a lunch break - it is unclear if he came up with the idea but he did change the font. Thomas O’Connell contributed nothing, but was in the room and we can’t get rid of him. Max Siegel is unaware of this submission but provided financial support to BE, KS, and TO.
